Drive business transformation with AI

Discover how you can enrich employee experiences, reinvent customer engagements, reshape business processes, and accelerate innovation

65% Of enterprises reported using and deriving business value from generative AI in 2024[1]
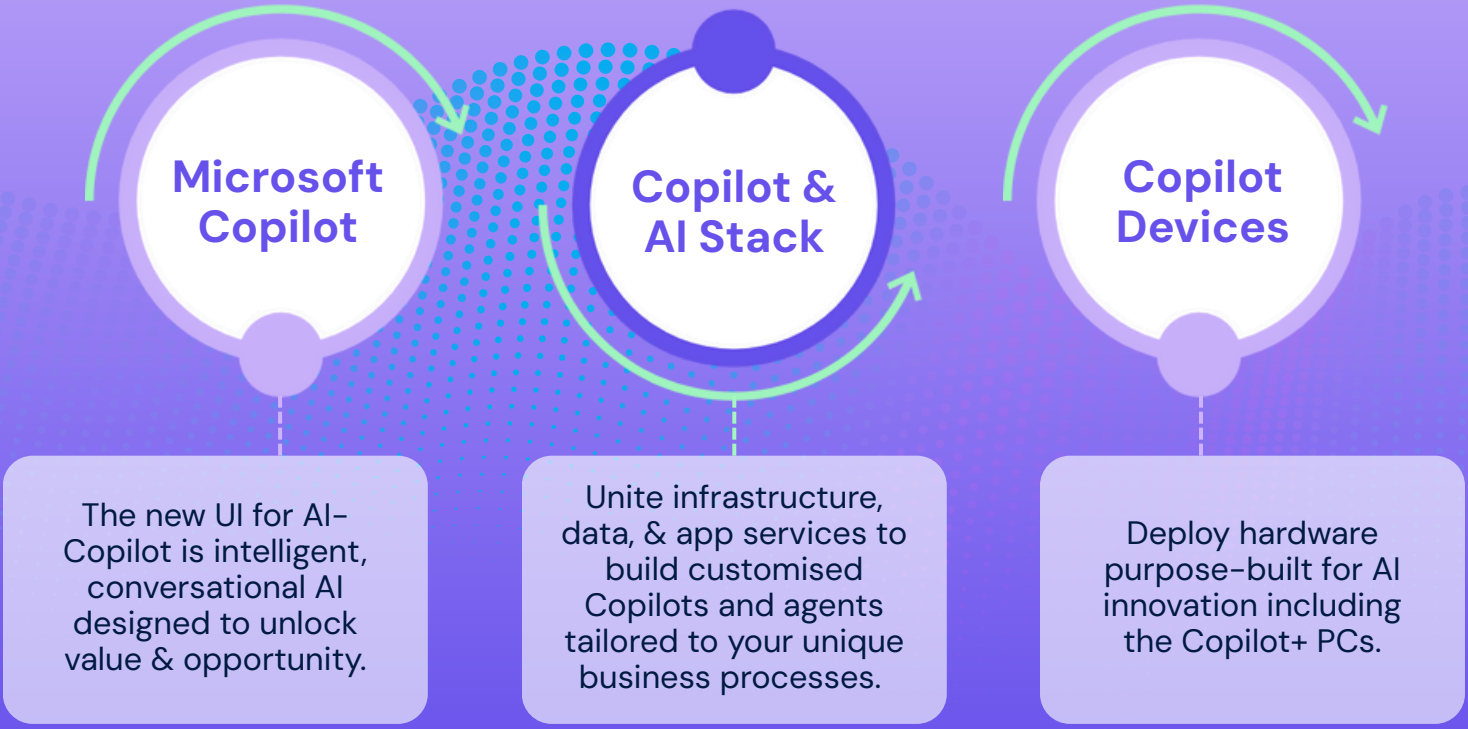

You want to move to the cloud on your terms, at your own pace. **Wanstor** and Microsoft offer an adaptive cloud approach that aligns to the rhythm of your business, helping you easily migrate and modernise your data, infrastructure, and apps.

Working with **Wanstor** to unlock the full potential of Microsoft AI allows you to develop trusted and safe AI solutions that:

- Increase employee productivity and wellbeing.
- Reinvent customer experiences.
- Reshape every business process.
- Bend the curve on innovation.

Microsoft is a proven leader in enterprise AI transformation with a full technology stack and portfolio to help organisations power their AI transformation.

Let us show you how Microsoft can power your AI journey with a comprehensive suite of tools and services.

Microsoft Copilot

Copilot & AI Stack

Copilot Devices

The new UI for AI–Copilot is intelligent, conversational AI designed to unlock value & opportunity.

Unite infrastructure, data, & app services to build customised Copilots and agents tailored to your unique business processes.

Deploy hardware purpose-built for AI innovation including the Copilot+ PCs.

Whatever your business priorities and strategies are, **Wanstor** and Microsoft can help empower your organisation to harness the full potential of AI to accelerate the transformation of your business opportunities into tangible, scalable outcomes.

Enrich employee experience

Enhance productivity by automating routine tasks and providing intelligent insights. Copilot allows employees to focus on more strategic tasks, boosting productivity and collaboration and fostering a more engaging and fulfilling work environment.

Reinvent customer engagement

Copilot enables personalised and efficient customer interactions with chat features that lead to higher satisfaction and loyalty. Integrating AI into your customer ecosystems enhances experiences and gives more intuitive control.

Reshape business processes

Orchestrate agents into any of your workflows and build your own transformational AI experiences with the Copilot and AI Stack. Streamline operations, reduce costs, and improve decision-making with real–time data and analytics.

Accelerate innovation

Copilot and AI stack fosters a culture of innovation by enabling rapid prototyping and deployment of new solutions, enhanced AI service delivery, and can accelerate the pace and scale of solution iterations.

Microsoft creates AI–first applications to enhance work environments, enabling businesses to build transformational AI experiences.

With over 1,800 AI models and several trusted developer tools, organisations can take advantage of an end-to-end AI toolchain, all delivered with enterprise-grade security, compliance, and trustworthy AI leadership.
