

The Microsoft 365 Copilot advantage for growing businesses

Embark on your journey to becoming a Frontier Firm by integrating the advanced AI capabilities of Microsoft 365 Copilot with Wanstor. As you think about your AI implementation goals, we can walk you through how to test AI use cases in Microsoft Copilot Chat and your favourite Microsoft tools. These capabilities empower your employees to transform how they work – all while improving productivity and innovation without compromising on security.

Let's explore the benefits you unlock at each stage of the AI adoption journey.

1

Consistent UI for AI

[Overview](#) | [How to get ready for Microsoft 365 Copilot](#)

Realise value from day one by engaging with Copilot Chat to get standardised user experiences across web, desktop, and mobile:

- Free and secure unified AI chat for consistent experience across users, roles, and functions.
- Draft new content based on emails, meeting notes, or web-relevant content in the flow of work.¹
- Collaborate with multiple teammates and stay organised on a dynamic canvas with Microsoft Copilot Pages.
- Save time and boost productivity by delegating repetitive tasks to Microsoft Copilot Actions.²

2

AI is integrated into the tools millions use every day

[Video tutorials](#)

Empower your teams to deliver faster outcomes with AI embedded in the tools they already use to minimise training time and maximise productivity:

- Sort through and respond to priority emails quickly in Microsoft Outlook.
- Understand, recap, and answer questions based on visual content shared onscreen during Microsoft Teams meetings.
- Easily build and share the outline of a session or detailed script for a presentation with Microsoft Narrative Builder.
- Analyse data using Python in Microsoft Excel with custom visualisations to show trends.

3

Microsoft Copilot Studio customisation makes it your own

[Overview](#) | [Community](#) | [Announcement: Easily build Copilot agents](#) | [Tailor the experience with your own agent](#)

Create agents with your first-party and third-party data and apps using Copilot Studio to reflect your business priorities:

- Discover, pin, and use custom agents curated for your organisation.
- Add specialised skills and knowledge while automating specific tasks with prebuilt agents.¹
- Automate business processes using agents that will act on behalf of the team.^{1,2}
- Unlock over 1,500 prebuilt connectors over all your data.³

4

Enterprise-grade security, privacy, and compliance is connected directly to your business data

[Data, privacy, and security for Microsoft 365 Copilot](#) | [Responsible AI](#)

Confidently scale AI across your growing business with built-in compliance and governance:

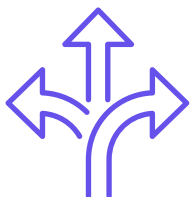

- Detect potentially risky AI usage, insider risk severity levels, and inherit Data Loss Prevention policies based on the label.
- Easily control who can create, share, and use agents across your organisation.
- Monitor content sprawl and oversharing and streamline content management.
- Support compliance with key regulations and initiatives like SOC, GDPR, HIPAA, and CSA STAR.
- Restrict the storing and processing of data within the EU data boundary.

5

You get flexible purchasing and deployment options

[Microsoft 365 Copilot pricing options](#) | [Get AI-ready with FastTrack](#)

Provide your teams with the flexibility and choice to use agents with a deployment model that fits your budget and timeline:

- Build, use, and publish agents on a consumption basis for Copilot Chat.
- Use agents grounded in your enterprise data and third-party data with Microsoft 365 Copilot.

6

Copilot delivers measurable AI impact and business value

[Admin centre reports](#) | [Microsoft 365 Copilot Adoption](#) | [Microsoft Copilot Dashboard](#)

Drive adoption and quantify the impact of AI with Copilot Scenario Library, Prompt Gallery, and the Copilot Dashboard:

- Find, save, and manage prompts directly in your favourite Microsoft 365 apps.
- Easily assign licenses, monitor usage, and enable feedback in one admin centre.
- Diver deeper into Copilot impact with customisable reports and detailed usage analytics.
- Measure ROI of Copilot to understand how usage relates to KPIs.

Ready to turn Copilot into measurable value? **Book an AI Opportunity Discovery** with Wanstor. In a focused session, we'll identify 3-5 high-impact use cases and the quickest path to ROI.
