

Copilot Adoption Service

Enable at speed | Build with precision

Our Copilot Adoption Service gives you weekly enablement, clear communications, and expert guidance, all designed to embed Copilot into the way your teams work.

Rapid, measurable adoption

We help you shift from “we bought licences” to people using Copilot confidently through weekly enablement, clinics, and consistent nudges.

Build a pipeline of high-value use-cases

Real problems from your business are captured in clinics, champion sessions, and stakeholder check-ins – forming a prioritised backlog of improvements.

Sustained momentum every week

Two weekly 45-minute live sessions (enablement + clinic), plus weekly tips and examples, keep adoption moving at a steady, manageable pace.

Clear reporting & leadership visibility

You receive monthly adoption reports, monthly comms packs, and quarterly leadership readouts with progress, blockers and next-quarter action plans.

Weekly value, every week

Your Adoption Specialist will provide a consistent rhythm of activities that drive behaviour change.

Included onsite day

One onsite day per month with a fixed agenda to maintain momentum and stakeholder alignment.

Shared dashboard

A single place to monitor adoption metrics & pipeline progress, supported by leadership-ready insights.

Next steps

We typically start with Adoption to establish weekly momentum and build a quality use-case backlog. Studio Retainer is then added to deliver priority agents/automations, with Agent Care and light governance reviews providing long-term reliability and control.

Package	Price	Onsite included	Notes
Remote only Adoption	£2,400 / month	0	Weekly sessions + comms + monthly report + dashboard
Adoption Essentials	£2,600 / month	1 day/quarter	Weekly sessions + comms + monthly report + dashboard
Adoption Standard (Rec.)	£2,800 / month	1 day/month	Standard rhythm plus fixed monthly onsite day, champions, quarterly leadership readout.
Adoption Plus	£3,400 / month	1 day/month	Standard + extra monthly enablement/stakeholder touch

How it works

1. Enable users weekly and reinforce habits
2. Capture use-cases in clinics, champion sessions and stakeholder touchpoints
3. Prioritise a single backlog (value / effort / risk)
4. Build and test solutions with the Studio Specialist (including UAT support)
5. Roll out with training + comms so solutions get utilised
6. Measure outcomes in the dashboard and iterate

Onsite: extra days available. Studio delivery: remote. Governance setup and Agent Care available as add-ons.
