

Copilot

AI + Copilot Advisory Services

Strategic guidance for
smarter AI adoption

Organisations across the UK are accelerating their AI transformation to stay ahead in a rapidly evolving digital landscape

Gartner predicts that by 2026, more than 80% of enterprises will have deployed generative AI applications or used GenAI APIs, up from less than 5% in 2023.

Across industries, businesses are recognising the transformative potential of Generative AI (GenAI) and Copilot technologies.

As digital demands grow and competition intensifies, forward-thinking organisations are exploring how these tools can unlock new efficiencies, drive innovation, and deliver measurable value.

Why organisations should Adopt Copilot:

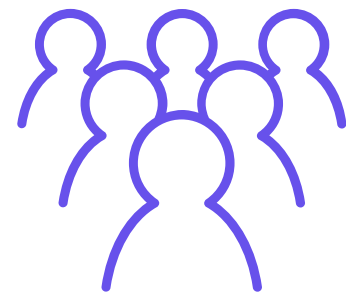

As organisations across the UK seek smarter, faster ways to work, Copilot is emerging as a transformative tool that empowers teams to unlock productivity, streamline operations, and innovate with confidence.

- + **Boost Productivity:** Automate repetitive tasks and reduce time spent on manual work.
- + **Maximise ROI:** Drive measurable outcomes through improved efficiency and reduced operational costs.
- + **Customisable to Roles:** Tailored experiences for different departments and user groups.
- + **Enhance Decision-Making:** Access real-time insights and intelligent suggestions directly within familiar tools.

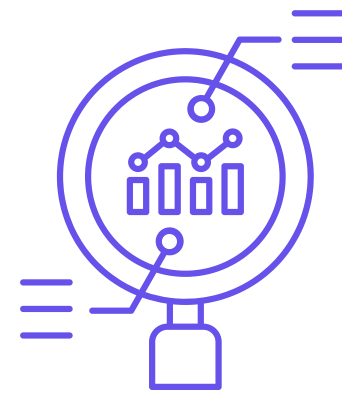

Business transformation with Copilot & GenAI

Wanstor partners with organisations to showcase the wide-ranging applications of Copilot and GenAI across business functions. Every engagement is tailored to reflect your unique working practices and user needs.

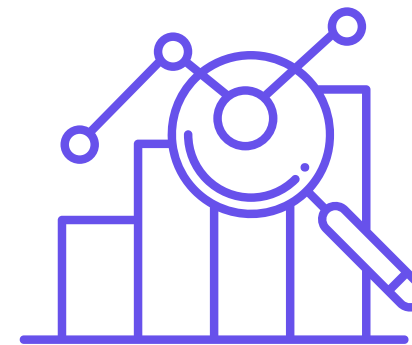

Organisations across the UK are embracing Copilot and GenAI to revolutionise how teams work, collaborate, and innovate. These tools helping businesses unlock new levels of productivity and performance. By integrating Copilot into everyday workflows, organisations empower users to work smarter, make faster decisions, and focus on what matters most.
